EXAMINER 'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mary Ramos Olynick on 12-10-04.

The application has been amended as follows:

In the claims:

Claim 32, line 1, " 32. (New) An apparatus as recited in claim 15, wherein the analyze module is further configured to perform web caching." has been changed to --- 33. (New) An apparatus as recited in claim 15, wherein the analyze module is further configured to perform web caching. ---.

Reason for allowance

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 3-9, the prior arts fail to teach or fairly suggest an apparatus for buffering packet data sent from a first node to a second node within a computer network, the apparatus comprises a second processor, wherein the second processor of the second device manages the buffer of the first device by causing data fragments of a datagram to be stored in the buffer in an order that was used to send such data fragments, in combination with other limitations, as specified in the independent claims 3, and 4.

Regarding claims 10-11, the prior arts fail to teach or fairly suggest an apparatus for buffering packet data sent from a first node to a second node within a computer network, the

Art Unit: 2665

apparatus comprises a second processor, wherein the second processor of the second device manages the buffer of the first device by instructing the first processor of the first device to read and analyze packet data from a particular buffer address of the buffer, in combination with other limitations, as specified in the independent claim 10.

Regarding claims 12-27, and 31-33 the prior arts fail to teach or fairly suggest an apparatus for buffering packet data sent from a first node to a second node within a computer network, the apparatus comprises a manager module for receiving packet data, the manager being configured to send commands to the buffer module indicating that received data packet is to be stored within the buffer at locations specified by the manager module and specifying data portions that are to be transmitted from the buffer to a selected destination, in combination with other limitations, as specified in the independent claim 12.

Regarding claims 28-30, the prior arts fail to teach or fairly suggest an apparatus for analyzing packet data sent from a first node to a second node within a computer network, the apparatus comprises a second means, wherein the second means is also configured for receiving the transmit command and in response to such transmit command, transmitting the specified data portion from the buffer, in combination with other limitations, as specified in the independent claims 28, 29, and 30.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
